EDUCATION

Bachelor of Technology (B.Tech) – Computer Science, SRM University AP (Ongoing)
CGPA: 8.61

Aug 2024 – May 2028

EXPERIENCE

Full Stack Developer Intern (MERN + Redux)

May 2026 – Present

Agumentik Group of Companies

- Designed and developed full-stack applications using MERN stack with Redux state management and RESTful APIs, cutting feature delivery time by ~25% across a collaborative team.
- Architected backend services using Node.js, Express.js, and MongoDB, applying distributed systems and concurrency principles to handle 100+ concurrent requests with stable response times.
- Led end-to-end development of Linking Road as Team Lead, coordinating 4+ members on task distribution and code reviews, reducing integration conflicts by ~30%.

PROJECTS

AI Medical Report Analyzer (MERN, Gemini AI, Kafka, Docker) [Repo Link](#)

- Architected a production-grade AI-integrated healthcare platform using microservices across 4 services (Auth, Report Processing, AI Analysis, API Gateway), improving fault isolation.
- Implemented event-driven communication via Apache Kafka with dedicated topics, enabling non-blocking concurrent processing of 50+ simultaneous report uploads.
- Containerized the system using Docker Compose with Zookeeper coordination; integrated Google Gemini AI with HuggingFace fallback, generating insights in under 4 seconds.

Plagiarism Checker (Node.js, LCS Algorithm, JavaScript) [Repo Link](#)

- Implemented the Longest Common Subsequence algorithm from scratch in JavaScript to compute character-level text similarity, classifying documents into Low/Moderate/High plagiarism tiers in under 1 second per comparison.

Online Food Ordering System (MERN, Stripe) [Repo Link](#)

- Built a full-stack ordering platform with role-based Admin/User dashboards, real-time order processing, Stripe payment integration, and optimized MongoDB indexing for concurrent sessions.

SKILLS

- Languages:** C/C++, Python, Java, JavaScript, SQL
- Computer Science Fundamentals:** Data Structures and Algorithms, Object-Oriented Programming, Operating Systems, Computer Networks, DBMS
- Systems and Architecture:** Distributed Systems, Concurrency and Multi-threading, Microservices, Event-Driven Architecture, RESTful API Design, System Design
- Software Engineering:** Scalable Architecture, Microservices, Event-Driven Systems, API Gateway, Message Queues (Kafka, RabbitMQ), RESTful API Design, System Design, Debugging, Agile/SDLC
- Development:** React.js, Node.js, Express.js, Redux, MongoDB
- Infrastructure and Tools:** Docker, Apache Kafka, RabbitMQ, Git, GitHub, Postman
- Machine Learning:** TensorFlow, Applied Generative AI (Gemini, HuggingFace)

ACHIEVEMENTS & CERTIFICATIONS

- Solved 200+ DSA problems on LeetCode with emphasis on graph traversal, dynamic programming, trees, and algorithmic optimization.
- Awarded the Reliance Foundation Undergraduate Scholarship for academic merit.
- Achieved JEE Advanced All India Rank 2706 among engineering aspirants nationwide.
- MongoDB Associate Developer — MongoDB; Principles of Generative AI Certification — Infosys Springboard
